

## **DENR COTABATO GEARS CONSTRUCTION OF THREE WATER RESERVIORS**

As part of its mandate to conserve the country's natural resources, the DENR Cotabato Province will be constructing three small water impounding structures (SWIS) with a total volume of 76.7 cubic meters with a sum of Php 2,322,00.00 this year.

These structure are located at Barangay Poblacion II, Banisilan with a volume of 40 cubic meters, Campo 10 Brgy. Rangayen, Alamada with a volume of 18.7 cubic meters level II, and at Sitio Embasi, Barangay Perez, Kidapawan City with a volume of 18 cubic meter level II.

With the completion of these three (3) structures, adequate and potable domestic water supply will be available 24/7 and will also prevent the occurrence of water-borne diseases in the barangays covered by the projects.

The conservation of water resources came into fruition after the DENR conducted the watershed characterization and development of Integrated Watershed management Plan in the three (3) watersheds namely the Malitubog-Maridagao (MALMAR), Libungan-Alamada River and Saguing-M'lang River watersheds.
