

FIRE FIGHTING TOOLS TO BOLSTER DENR CAPABILITIES AGAINST FOREST FIRE

This year DENR Cotabato purchased several equipment and tools to strengthen its firefighting capabilities in the prevention and suppression of forest fire in the province.

The purchased materials are 30 pieces of plastic drums, 3 units power spray; 3 units water pump (10HP) with 4x4 suction hose and 4x 20 and 4x50 meters duct hose; and 600 meters hose.

Last year, several incidence of forest fire occurred in the province including the majestic Mt. Apo natural Park. While the incidence of fire were eventually suppressed, DENR realized that more has to be done particularly in the availability of equipment and tools.
